

First side views with no man and in intensified viewing only. The lamps dominate all fully and what is out in the dark is invisible. None can imagine what is behind the boat

Viewing zone about 200 meter away in the forest on other side of the bay water. The boat is dark and masts appear as black shadow. Trees in the font appears white and the boat is a dark shadow in the front

*Same plane and same time but here we are inside the forest so the first trees are in the shadow in front of the illuminated trees
Tests show that we can get into 70-90 % though vegetation and still see something behind this.
We have looked through military masking nets and can see what is behind by the holes in the net.*
