

Gated viewing Lynx cameras

*Images of outputs of the camera
Intruder detection of a person*

Top view

Buildings at 600 meter distance in dense snow fall. Snow flakes gives reflexes of the IR lamp we use for illumination. The Gen. 2 intensifier set down sensitivity because of reflexes

Bottom view

*Same place and same snow but we gated the reflexes away and can see and have a clear image
Field of view is 7.5 degree and target is dark and it is very dark outdoor. Still image is clear*

Many of our product are protected by patents and patent applications
