

Argusview

Argusview cat eye reflex detection device is a highly advanced system to detect anyone observing you using any type of optical system.

Maximum detection range	1400 m
Detection range accuracy	±10 m
Scanning speed	90 °/sec
Angular dimensions of detection area	(1.0 x 0.1)°
Power-supply	"__" type batteries (10)
Power supply voltage	(9 - 15) V
Continious operation	up to 8 hours
Operational temperature	from -20 °C to +50 °C
Detection unit weight	0.8 kg
Detection unit overall dimensions	105 x 115 x 55 mm

Image of a hidden sniper in a building. The snipers telescopic sight gives a string retro reflex easy to see even by a little trained operator. Range can be up to 1400 meter and the system operated in full sunshine and darkest nights with no limitations.
